

## C003-CO Emerald coast

The Emerald coast stretches from the Groin headland to the Val André. This rocky and ragged coast offers a variety of forelands and capes jutting out into the sea, and outstanding panoramas. The rocks lining the coastline sheltered the first sailors and were used as a natural protection against invaders by seaside towns, such as Saint Malo. But the emerald coast can also be gentle and welcoming with its sandy beaches, the most famous - Dinard, Paramé, Sables d'or les Pins, welcome more and more tourists each year.

### Itinerary

**Day 1** - Arrival at SAINT MALO. Discovering Saint Malo is an adventure in itself ! The old city, protected by its fortified walls and château, holds numerous private hotels and sumptuous granite houses. You will relive this history while strolling within the city walls. *Lodging and breakfast in a 4-star hotel within the city walls*

**Day 2** - SAINT MALO – DINARD (15 km). The walk will be short so that you may spend the morning discovering the many facets of Saint Malo. But Saint Malo is also a recognized seaside resort with long beaches that stretch out over the Pointe de Rochebrune. As you begin your walk out of Saint Malo, you will discover Grand Bé Island, accessible only at low tide, where rests the famous writer Châteaubriand. You will next arrive at Saint Sevran-sur-Mer and will continue along la Corniche d'Aleth. This stretch will present you with stunning views that you'll want to take in slowly before reaching Port Solidor and the tower which once stood in defence at the mouth of the Rance river. You will come upon the tidal power station, which takes advantage of the tidal shifts to produce electricity, and cross the river to proceed to Dinard.
